

**Step**

**1**

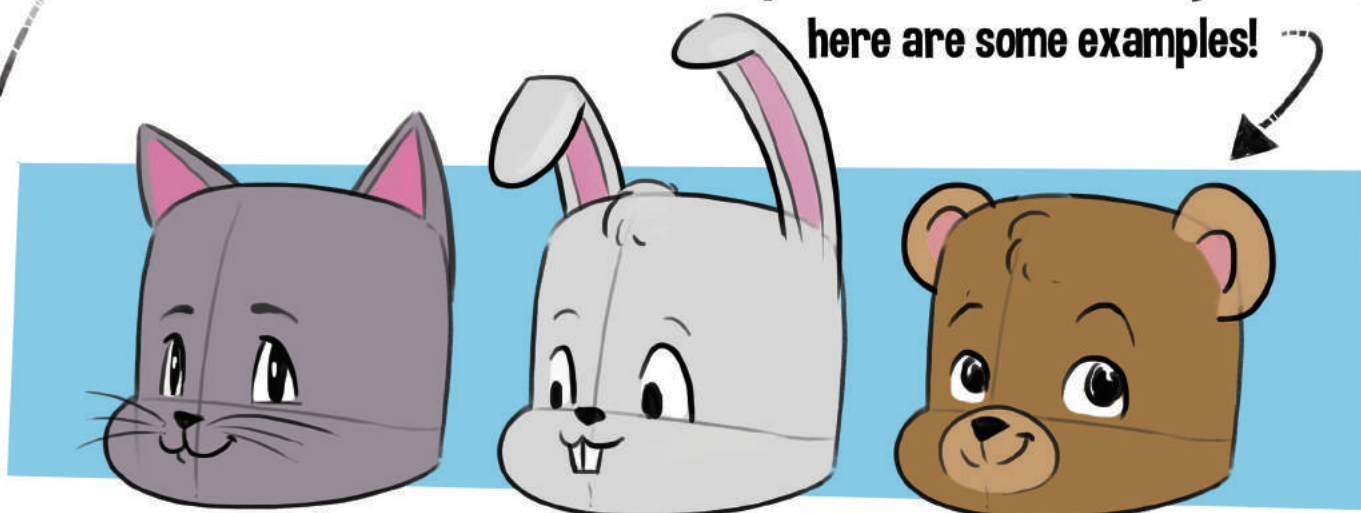

To start off drawing our puppy, we're going to draw a basic shape for the head!

This shape is a soft square, with a round shape sticking out for the snout or cheek.

You can also use this same starting shape to draw other cuddly animals, here are some examples!

**Cat**

**Bunny**

**Bear**

**2**

Add on your Pups eyes, ears, nose and month.

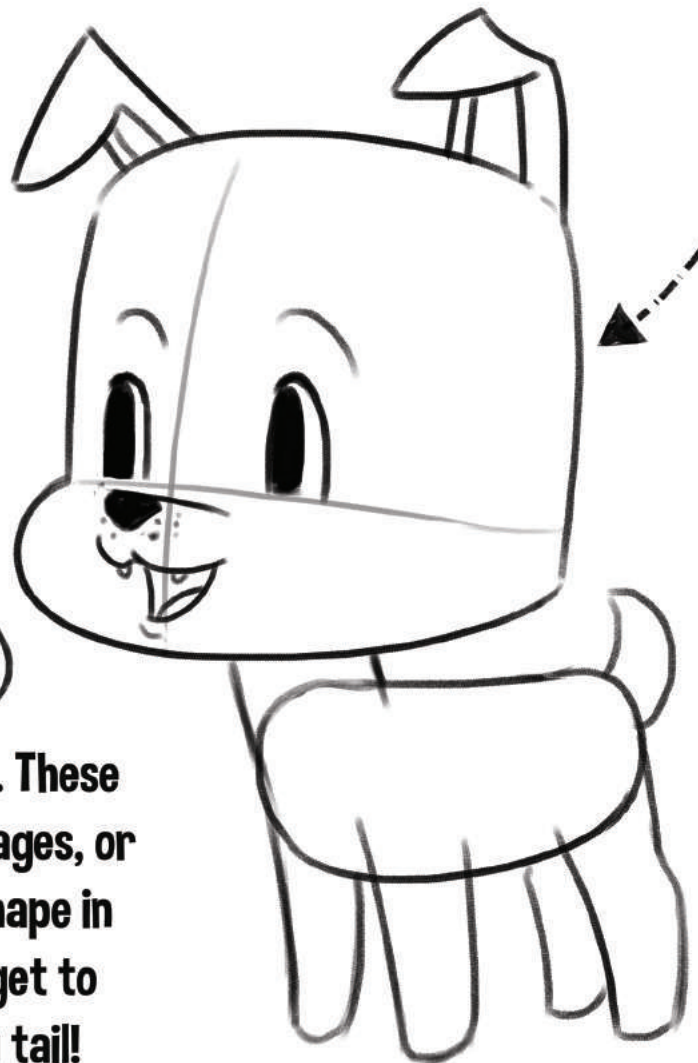

Think happy thoughts and smile as you draw the puppys expression to help make your drawing smiley as well!

3

Next we draw on a small 'jelly bean' shape for the body, and lines to connect the neck.

**Pro Tip:** Make sure all the lines at this point are nice and light! Don't press too hard with the pencil, that way we can continue over these shapes to add more detail.

4

Now for some simple legs. These can just be drawn as sausages, or you can add a bit more shape in the back legs. Don't forget to draw a happy, wagging tail!

**5**

Your drawing could be finished at step 4, but go ahead and add some more details and personality to our Puppy if you want!

You could add a collar, spots or stripes, or maybe some scruffs of fur around the edges.

**Finished!**

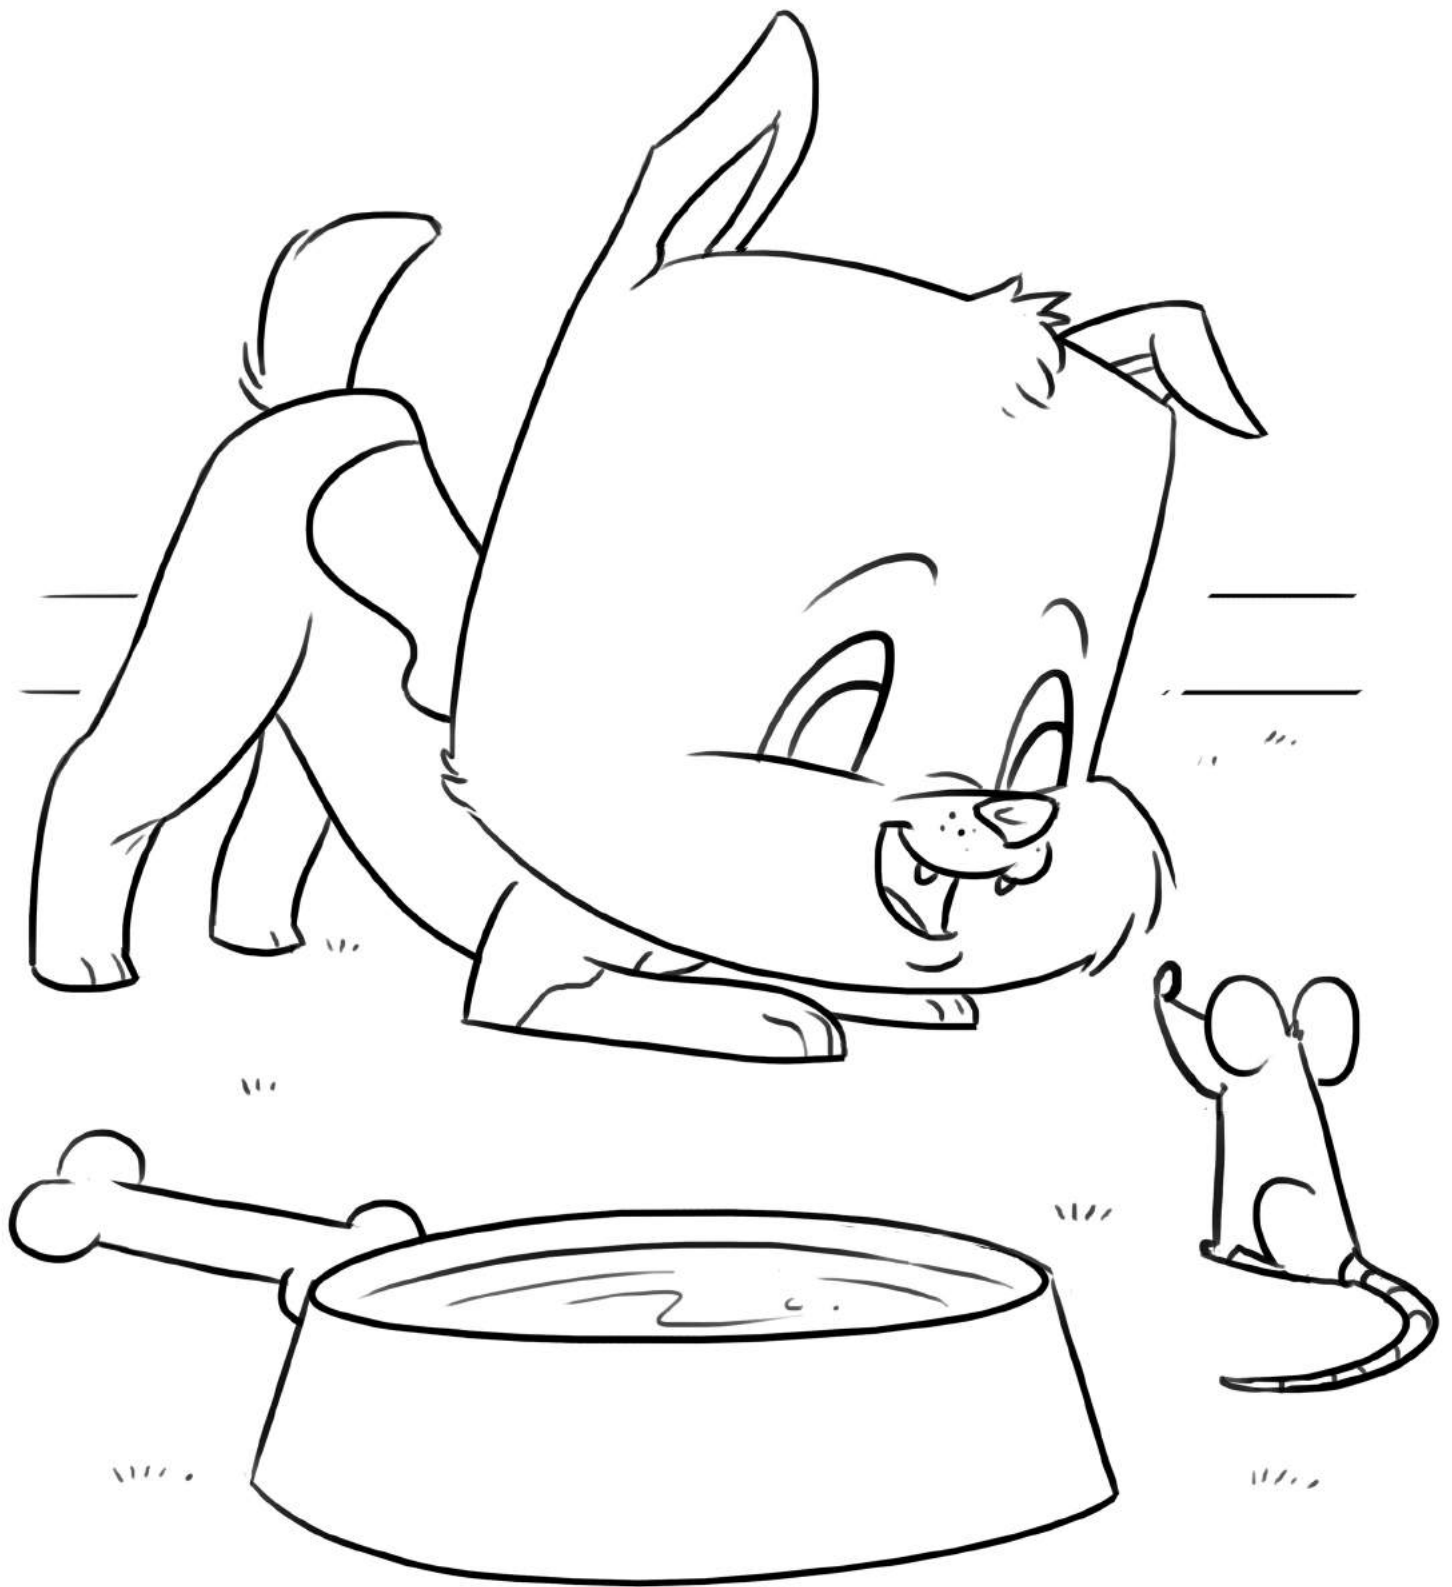

**6**

To finish the drawing, add some colour! A little colour can go a long way, and colour pencils work great for adding a finishing touch to your picture.

Have fun and remember to give your Puppy a name as well!

# Puppy Colour In Page!

Learn to draw like a pro with weekly Afterschool  
Workshops throughout Auckland for kids age 5 and up!
